

# Export Ideas >> Add Categories and Meta Data

---

We have turned on Ideas in the [Dream It](#) section of our community and it is growing with great success. I would like to have the ability to export the categories in the extract so it's easier to report on

7136	Get ID faster for Dynamic Content	<p>I'm working with Eloqua almost a year now ! I love this job.</p> <p>I have a little dream about an idea that i thought some time now.</p> <p>I know that is possible and easy to integrate with an Eloqua Update.</p> <p>Well here we go : I had some problems with some of the developers that delete the name from that span that integrates into an email an ADC ( Additional Dynamic Content ) so i have only the ID of ADC, so if I want to modify anything inside that ADC that i have only the ID it takes me a lot of time to find it.</p> <p>So my idea is that if it can be integrated the ID of the ADC as shown below on the modified screenshot :</p> <p>And also if we can search by ID on the search field.</p> <p>It will be easy to find ADC's.</p>	60	
		we currently can't do this or it's not clear
