

# Re-evaluate Welcome Aboard Mission

---

One of the tasks in the [Welcome Aboard! Mission](#) is to create an idea in [Oracle Community Ideas](#) space, as well as *liking* comments and rating documents and posts. I do not believe that creating an idea and judging people's posts is necessarily such a good idea in anticipation of completing a mission to score 500 points.

I also wonder why *follow another user by sending a Friend request* is part of that mission. It's not a big deal, but I have received several *Friend* requests from people with no posting history and the *Welcome Aboard* mission might be the reason.
