

Comment should be Mandatory if Vote down on an Idea

On an Idea we created, so many people vote on it, and so many people may Vote Down without any explanation. What my idea is can we provide an mandatory Comments Option who Vote Down on any Idea. So that they can let us know whats the reason they vote down the idea.

By this feature we can improve our thinking on which is better when we see from multiple people around the world. So that we can get better ideas rather creating the Idea whatever come into our mind.

And this Mandatory Comments does not require for Vote Up as it says they agree with our idea.
