

# Eloqua Profiler Usage Reports

---

Hello. Hoping to see standard usage reports for Eloqua Profiler included in Insight Reporting. While reports like this exist for the Engage product, Profiler does not have such reports. After large scale deployments of Profiler, it would be beneficial to be able to run a report to see which users are/have been actively using this particular tool. Ideally metrics such as LastLoginDate, AvgDurationOfUse, NumLoginsInXMonths etc. by sales rep would be beneficial. Current process requires an SR be logged in MyOracleSupport.

Thank you.
