

# Multiple Image/Document/attachment upload selection functionality in Community Thread

While doing Start a discussion or Write a document Insert Image option **has only single image** selection functionality. this limit users to do multiple clicks if he/she wants to upload multiple screenshot file for any issue. this limit person too who is answering the thread.

my suggestion is to either give a multiselection image option from upload image option or multiple upload browse button so that the user can select multiple images in one go. this applicable to attachment functionality also.

As of now in Cloud Customer Connect this is the Limitation, hope this should be taken care of in new platform implementation.

## Insert Image

The screenshot shows the 'Insert Image' dialog box with two tabs: 'From your Computer' (selected) and 'From the Web'. Below the tabs, the title 'Select an Image' is displayed. A single file selection interface is shown, consisting of a 'Choose File' button and the text 'No file chosen'. Below this, a message states: 'Maximum file size: 10.0 MB. Also, please note that images larger than 1600px wide or 900px tall will be scaled to fit those limits in your content.' Below the message, there is a list of five identical file selection rows, each with a 'Choose File' button and the text 'No file chosen'.
