

Remove vote history from ideas

To allow users to vote anonymously for ideas the history of votes should be removed.

Voting is an anonymous act (at least on most parts of the world I hope) and should be in the OTN forums too.

It's too easy to guess who voted in which way, at least until there are more than 5-10 votes on an idea.

Users who want to should how they voted can leave a comment. This way it's their decision if their name is visible or not.
