

Idea's to simplify mark answer as Correct/ Helpful

Hi,

I have recently joined the OTN community and it has been observed that many people keep the message while replying to discussion like "Please mark this reply helpful/correct if it does" which doesn't look good since they are helping out and look like begging for points/rewards.

So I am thinking of below idea's to simplify this:

IDEA 1:

Suppose I am the "Person 1" who has raised the question and another person say "Person 2" replies/answers to my discussion,
and again when I (Person 1) give response/reply to the "Person 2" then there should be one prompt above the editor
saying "Do you feel the earlier post of - "Person 2" Helpful/Correct"
with the buttons : 1. Mark as correct 2. Mark as Helpful 3. No

I am not saying this to enable for all who reply, This is just for the person who has raised the question.

IDEA 2:

Another Idea I am thinking is to enable the link like "Ask To Mark" (as we have like button currently) to the person who has replied/Answers the discussion.

Let me explain:

Suppose I am the person "Person 1" who has raised the question and I got reply from "Person 2" and If I (Person 1) again give response to the "Person 2" then on that response/reply there should be one link "Ask to Mark" enabled for the "Person 2" only and some encouraging message should get triggered (**when click on the link - Ask To Mark**) to the inbox of "Person 1" along with the link "Mark As Correct" / "Mark As Helpful".

Please let me know your inputs or if you see any challenges. Thanks!
